

## **PRESS RELEASE**

### **Magneti Marelli telematic equipment on the vehicles delivered by FCA to Expo Milano 2015**

This week the cars of Fiat Chrysler Automobiles, Global Partner of Expo Milano 2015, which constitute the car fleet the organization will use during the event, have been delivered to Expo Milano 2015. Out of a fleet of 105 vehicles, no. 50 methane-fueled 500L models are equipped with the Magneti Marelli telematic T-BOX.

The cars shall be used for the Car Sharing service exclusively available to the numerous international delegations that will be present in Milan in the next semester. A presence under the sign of sustainable mobility thanks to the low emissions and to the alternative fuel supplies.

The Magneti Marelli T-BOX is the beating heart of the entire Car Sharing service. The telematic box allows communicating with the service centre to locate the vehicle, besides enabling a set of functions such as the opening and closing of the doors, the ignition only by authorized people authenticated via a smartphone App, and the reading of the on-board system data, thus guaranteeing real-time information about the status of the car.

The T-BOX is part of Magneti Marelli's telematics offer, namely technologies and systems for the new cars and the existing fleet, which pave the way for new paradigms of mobility, consistent with the criteria of safety and security, sustainability and legislative trends (eCall).

*Magneti Marelli produces advanced systems and components for the automobile industry. With 89 production units, 12 R&D centres and 26 application centres in 19 countries, more than 38,000 employees and a turnover of 6,5 billion Euro in 2014, the Group supplies all the major carmakers in Europe, North and South America and the Far East. The business areas include Electronic Systems, Lighting, Motor Control, Suspension Systems and Shock Absorbers, Exhaust Systems, Aftermarket Parts & Services, Plastic Components and Modules, and Motorsport. Magneti Marelli is part of FCA.*
